

# Music Practice Tips

- Get a metronome and slow down difficult passages on the violin.
- Use the metronome in your practicing. Write down everything you practice in a journal including the speeds.
- Divide your scale sets of a large number of scales including Major, Minor and Chromatic into four small sets of scales.
- Day One Scale Set
- Day Two Scale Set
- Day Three Scale Set
- Day Four Scale set.
- Silently read your music without playing your instrument. Hear and internalise the notation in your “inner ear”. Do this before you got to sleep at night.
